THREE-ROW BRACELET MADE FROM PRECIOSA HILL™ BEADS

Simple,
but luxurious

PRECIOSA

Simple, but luxurious

Try using the new PRECIOSA Hill™ fire polished bead to create a simple bracelet for everyday and special use. This three-row bracelet highlights the semi-circular shape of the PRECIOSA Hill™ bead with its round flat base, while at the same time also supporting the rainbow reflections on the individual facets created thanks to the multiple cut.

Materials and tools:

The black variant

PRECIOSA Hill™ (H)
151 01 375; 8 mm;
23980/28703; black AB; 90x

PRECIOSA Rocailles (R)
311 19 001; 10/0;
23980; black; 72x

The copper variant

PRECIOSA Hill™ (H)
151 01 375; 8 mm;
00030/98533; copper; 90x

PRECIOSA Rocailles (R)
331 01 001; 10/0;
48095; pink; 72x

The grey variant

PRECIOSA Hill™ (H)
151 01 375; 8 mm;
03000/27203; white-grey; 90x

PRECIOSA Rocailles (R)
331 19 001; 10/0;
48020; grey; 72x

- 5-row guides, the 1st, 3rd and 5th eyes will be used; an opelon or elastomer elastic line; a thin tailor's thread

- a thin needle; scissors; a ruler; snipping pliers

Difficulty: 

Procedure:

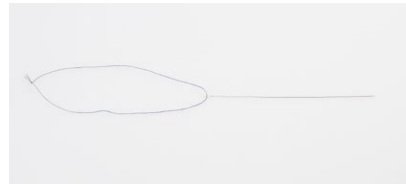

Step 1:

If you do not have a short 5-row guide or a 3-row guide with a larger gap between the eyes, cut a row of interconnected eyes. You need 6 guides with 5 eyes for the bracelet.

Step 2:

Thread about 15 cm of the thin tailor's thread into the eye of the needle. Tie off the ends of the thread. This will create a large thread loop.

Step 3:

Cut off about 70 cm of opelon. String it through the thread loop. Fold the opelon in half. If you are going to do the stringing on elastomer, only cut 40 cm. Only place the beginning of the elastomer in the thread loop.

Step 4:

Alternately string 1x H and 1x R. One section consists of 5x H with 4x 1 R between them. Then string the 1st eye of the guide. Continue stringing a new section and guide. Each row consists of a total of 6 sections and guides. All the H are turned in the same way. Tie off the end of the opelon and the elastomer with two knots. The elastic fibres must be neither too tight nor too loose. Cut off the fibres about 3 mm behind the knot. You can pull the knot on the opelonu into the H hole.

Step 5:

String the 2nd row. Thread the line through the 3rd eye (the middle one) of the guides.

Step 6:

String the 3rd row. Thread the line through the 5th eye (the last) of the guides.
