

Beadalon INSTANT PENDANT, LOOP CRIMP & LEATHER *Artistic Wire*[®]
INSTRUCTION SHEET

1. Hold the Instant Pendant tightly in your fingers (righty-tighty, lefty-loosey) twist the cone shaped finial **left** to unscrew it from the body of the Instant Pendant.

2. Continue twisting **left** until the finial is free.

3. Using the Conetastic Tool with the largest cone inserted, place an 8" piece of 16Ga wire into the hole of the tip. Carefully form a coil up to the top of the tool by rotating the tool while guiding the wire around the cone with your other hand.

4. Trim ends to form the coil shown above. Then thread it onto the Instant Pendant. Place the bead on and adjust coil so bead is snug when the finial is tightened on. Many variations can be made and best of all you can change it each time you wear it!

5. To attach the Loop Crimp to the Leather Cord, make sure the end is cut square, if not re-cut it. Grasp the Loop Crimp with the Micro Crimp Tool so that the jaws are on the slit sides.

6. Insert the cord into the Loop Crimp and make sure the cord comes to the top opening in the Loop Crimp.

Note: the photo shows using Poly Braid Material.

7. Carefully squeeze the Micro Crimp Pliers until the sides of the Loop Crimp begin to crush inward. Don't squeeze too hard as the leather can split if you squeeze too hard.

8. Cut the leather cord to the length that you desire.

9. Insert the freshly cut end of the Leather Cord into the loop end of the Instant Pendant, then repeat steps 5-7 to attach the Loop Crimp onto the other end of the Leather Cord.

9. Open two of the supplied Jump Rings and hook one onto one of the Loop Crimps then close. Hook the other onto the other Loop Crimp end, attach the Lobster Claw Clasp, then close it to finish the Instant Pendant Necklace.

To make the pendant permanent, put a drop of glue into the finial and screw onto the post.

Properly crimped Loop Crimps attached to Lobster Claw Clasp with Jump Rings.

Use large hole TierraCast spacer beads with the coil, or choose to use only the spacer beads.

Bead caps work well with the Instant Pendant as long as the hole is large enough for the pin.

Great thing about Instant Pendant is that you can switch the position of the coil and have a different looking pendant, bead first or coil first!
