

Valentine's Day Earrings with Preciosa Heart Flatback Stones

Don't know what to wear on Valentine's Day? Accessorize with a pair of custom, love-inspired earrings!

YOU WILL NEED

- Two Preciosa no-hotfix Heart flatback stones in any color of your choice in size 14mm so that they are larger than the earring studs.

We've selected 14mm Heart flatbacks in Crystal Honey.

- Earring studs
- Glue suitable for metal

DIY STEP-BY-STEP GUIDE

- 1** Evenly apply the glue to the top of the earring stud. Glue the stud to the bottom side of the Heart flatback. Make sure the stud is glued to the middle of the Heart so that the edges don't show when looking at the earring from the top. Hold it in place for about five minutes so that the glue sets.

- 2** Repeat the same process for the second earring.

- 3** Let the glue dry for the recommended amount of time according to the label. To be sure, we let ours dry overnight. Now you have the perfect accent for a romantic dinner!
