Sharps Gold Eye Beading Needle w/Threader Size 10

Step by Step Instructions for Chunky Boho Bracelets

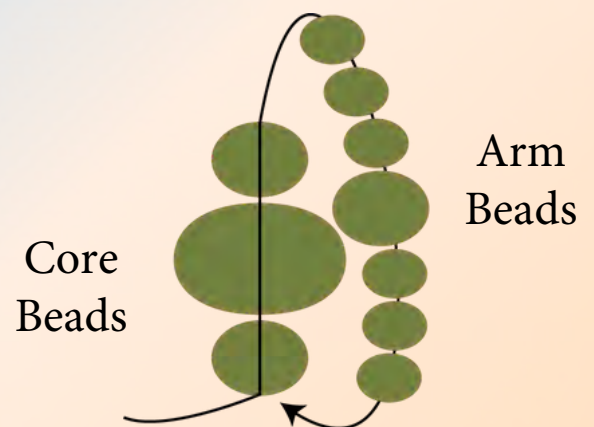

Begin by cutting 40 inches [102 cm] of thick beading thread. Wildfire .008 or 8lb Fireline are recommended. These are large beads that work best with thicker threads.

Thread a beading needle, slide the needle down 4 inches [10.16 cm] and fold over. This design is worked on a single strand.

Pick up the first three "core" beads. Core beads are the beads that will run through the center of the bracelet.

Core beads consist of a repeat of

6/0, 2/0, 6/0
or
6/0 32/0, 6/0

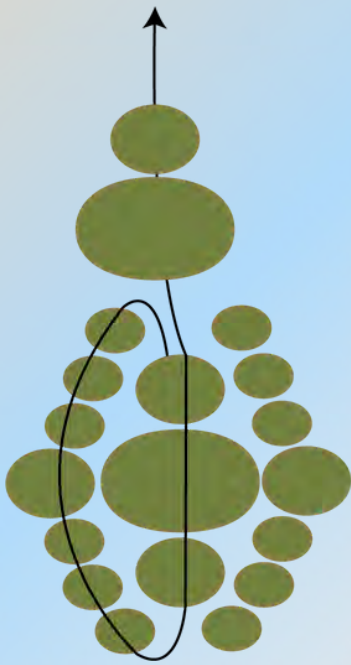

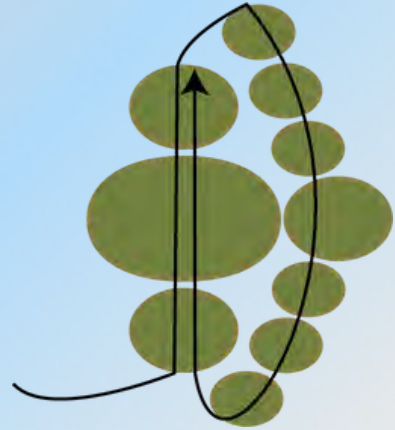

Pick up the first set of "arm" beads. Arm beads are the beads that will repeat on the sides of the core beads.

Arm beads consist of

Three 8/0 beads, one 6/0 bead, and three more 8/0 beads.

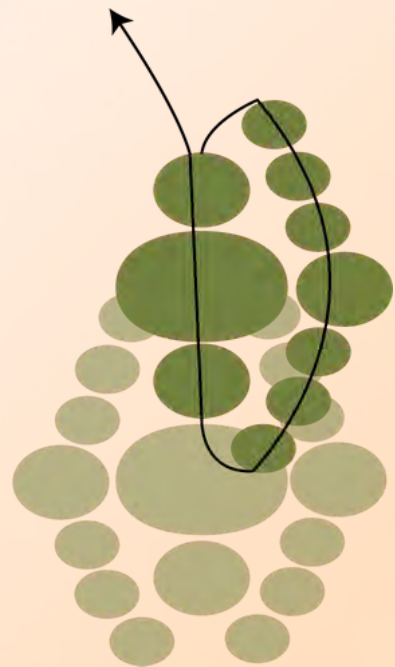

Go through the three core beads.

Pick up another set of arm beads. Go through the core beads again.

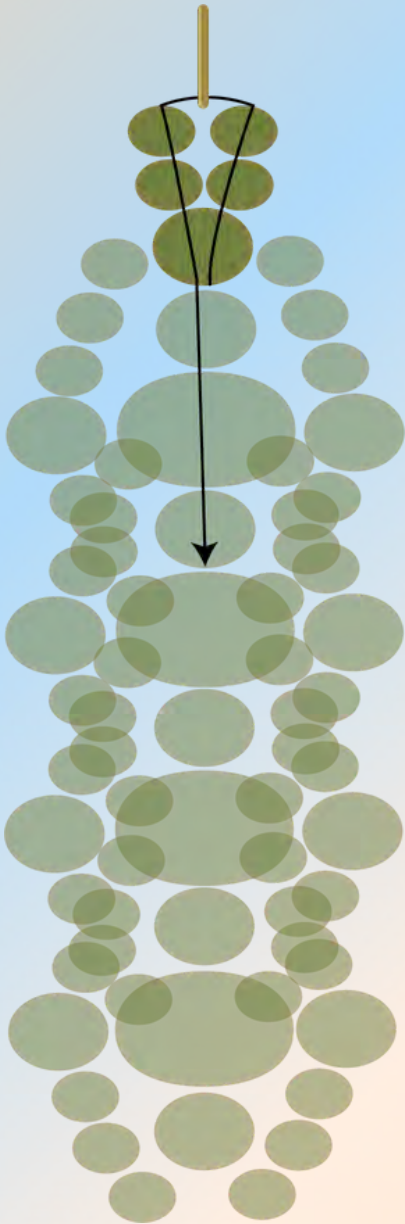

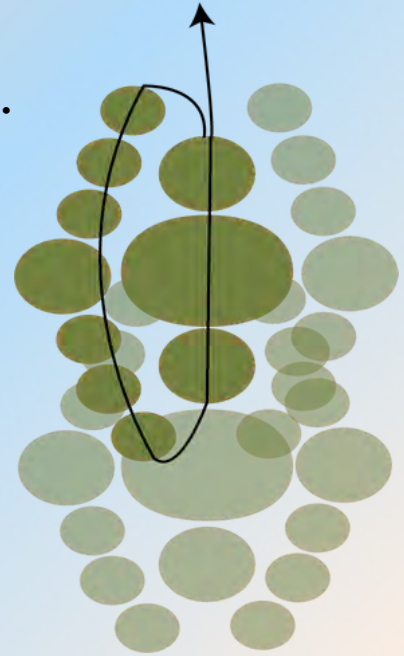

*Pick up one 2/0 [or 32/0 bead] and a 6/0 bead.

Pick up a set of arm beads.
Go through the top 6/0 bead from the first set of core beads and continue through the 2/0 [or 32/0] and 6/0 above it.

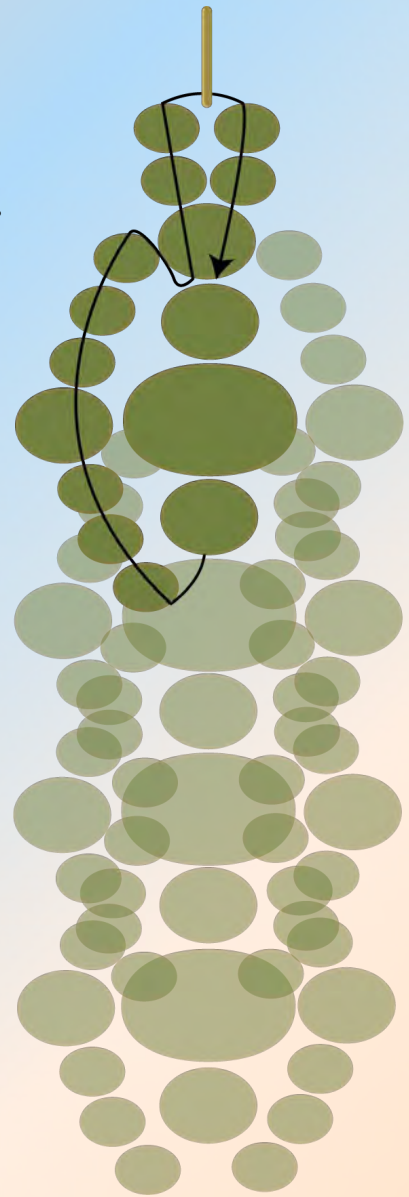

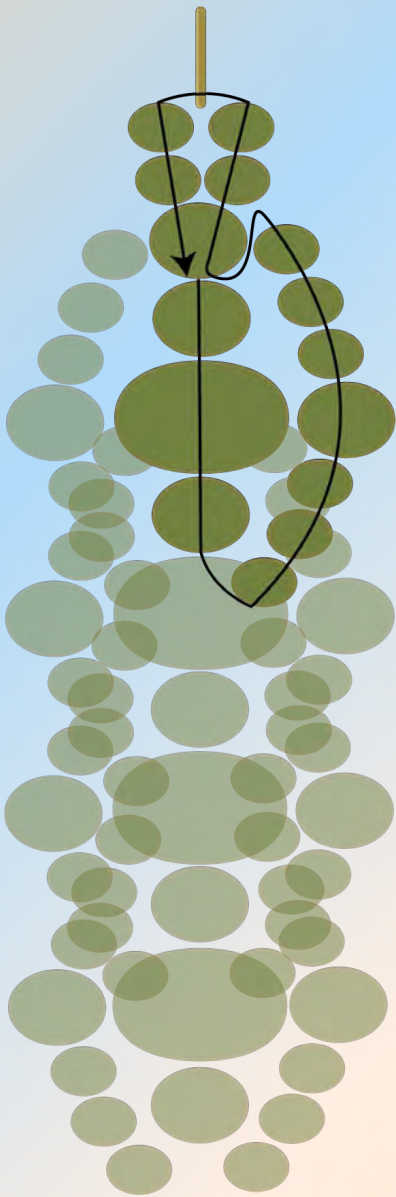

Pick up another set of arm beads.
Go through the same core beads again.

Repeat from * until you reach the
desired length of your bracelet.

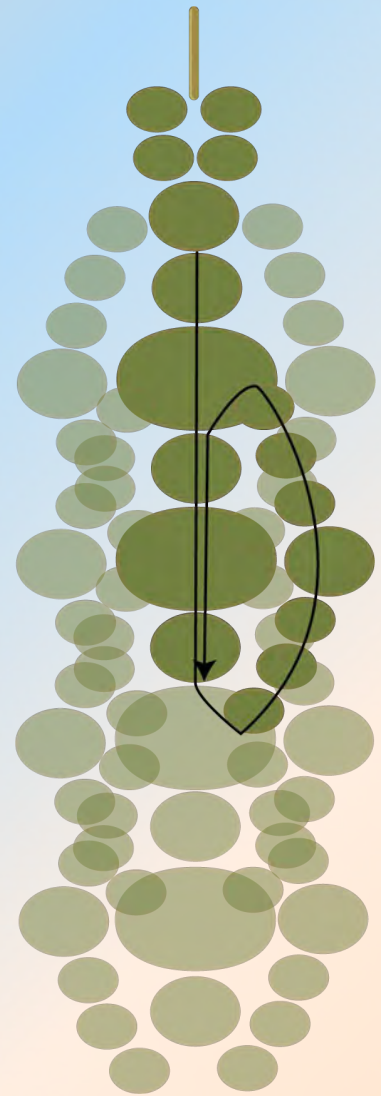

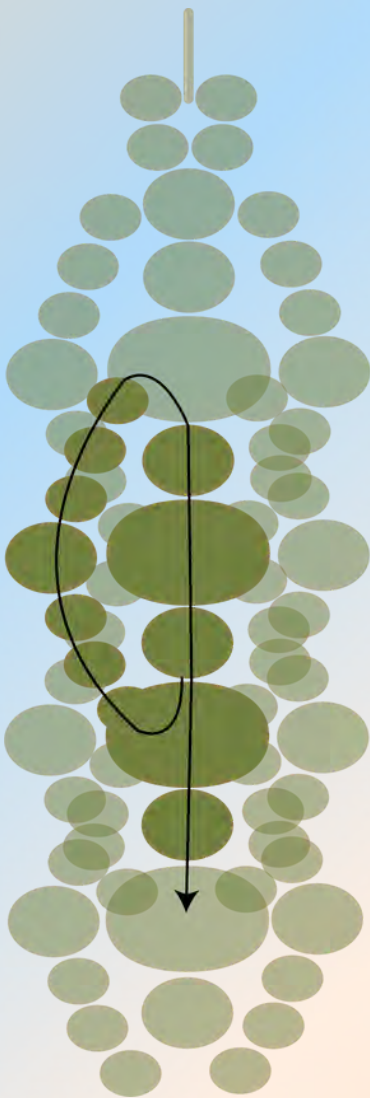

To add a clasp, pick up one size 6/o
bead, two size 8/o beads, go
through a jump ring, and two 8/o
beads. Go back down through the
6/o just added and continue
through the next three core beads.

Go through the spiral arm on one side.
Go through the 6/o bead and loop
through the 8/o beads and jump ring.
Go back through the 6/o bead.

Go through the three core beads
below, then come up through the
arm on the opposite side. Go
through the 6/o bead, loop through
the 8/o beads and jump ring. Go
back through the 6/o bead.

Go through the next 5 core beads below, Turn and go through the arm that is next down from the top. Turn and go back through the last three core beads.

Go through the arm on the opposite side. Turn and go back down through five core beads.

Trim remaining thread.

The following, alternate style may be used to finish the bar end of a toggle clasp.

Begin by adding a 6/o bead, then add three 8/o beads, go through the jump ring, then go back through the three 8/o beads, the 6/o bead, and the next three core beads.

Loop through the side arms and go through the core beads in the same steps as shown above to reinforce this connection and weave in thread.
