Art Deco Fan, Bracelet Version

Refer to the materials list and instructions for the Art Deco Fan Necklace to create a flower fan with John Bead Superduo Two-Hole Czech Glass Beads.

When you reach Step 5 of those instructions, complete the addition of size 6/0 beads around the fan, then, with your thread exiting the last Superduo bead on the left hand side, begin to create the bracelet strap as follows.

Pick up one size 10/0 bead and go through one hole of a Superduo. Turn and go through the other hole of the Superduo. Pick up one size 10/0 bead and go down through the left side hole of the superduo below. Go through the next Superduo and make a turn through its other hole, continue up through the 10/0 bead and the Superduo bead that was added in this step.

Pick up one size 10/0 and another Superduo bead. Turn through the other hole on the Superduo bead and pick up a size 10/0 bead. Go down through the next Superduo, turn and go up through its other hole and come up through the 10/0 and the next Superduo. String [10/0 and one hole of a Superduo] 62 times.

Tip: The counts in these instructions will create a 6.5" [17 cm] bracelet. To add or remove length, consider eight Superduo, strung in this fashion, equals 1" [2.54 cm]. To keep the clasp sitting below your wrist when fastened, you'll want to add or remove length evenly from both sides/straps. To do this, calculate the length you want to add or remove and then divide that by two. Add or remove that number from each strap.

Example, to make this bracelet 7.5" [19 cm] string 66 Superduo on this side.

When creating strap 2, string 4 additional Superduo beads to that count.

Finish the top of the strap by picking up two size 10/0 beads, a Superduo bead, and four size 10/0 beads. Go through the other hole of the Superduo. Pick up two size 10/0. Now go through the Superduo below, turn and come up through the other hole of that Superduo, and go through all the beads again until your thread is exiting the third Superduo bead. Turn and go up through the other side of that bead.

Continue through all the beads above. Loop around the four 10/0 at the top, then come down through the next six beads.

[Pick up one size 10/0, go through the next Superduo] until you reach the last Superduo.

Weave in your thread and trim if it is getting short. If you need to weave in / add thread within the strap, do so by looping through each hole of a Superduo bead, going through the next 10/0, looping around the next Superduo, go through the next 10/0, and trim. This same method will work for weaving in new thread and weaving in the old thread. Try not to make turns over 10/0 beads as that will cause them to bow together and that will change the flowy look of the strap.

When you reach the base of the strap, weave in to the fan and trim.

Weave in a new strand from the top, right of fan. Exit the 5th, 6/0 bead on that side. Pick up a 10/0 and a Superduo bead. Go through the other hole of the Superduo. Pick up a 10/0 bead and go through the 6/0. Go through the 10/0, Superduo, and pick up a 10/0 and a new Superduo. Go through the other hole and pick up a 10/0 bead, go through the next Superduo, loop around and come back up through the other hole, the 10/0, and Superduo above. Now begin to string 10/0 and Superduo.

[String a size 10/0 bead and a Superduo bead] 13 times.

As we did with the other strap, create and reinforce a stack of two 10/0 beads, a Superduo and four 10/0 beads, as shown.

Go through the Superduo and add two 10/0. Go through the next Superduo and go through all the beads again to reinforce.

After reinforcing, continue back down the strap adding 10/0 beads between each Superduo until you reach the existing 10/0. Go through the 10/0 and next beads, then continue through the 6/0 and up the side of the fan, tying half-hitch knots along the fan side per the Fan Necklace instructions.

The last step is to add a clasp and jump rings to the loop of four 10/0 beads on each side of the strap.

How to wear it: Place the fan on top of your wrist. Bring the long strap around your wrist one time and bring it under the fan and up through the hole. Continue over the top of the fan and around the wrist. Clasp it to the short strap on the underside of your wrist.
