Beading Mat SKU 10348546

Chain Nose and Bent Nose Pliers SKU 10121794 and 10121795

Skill Level - Beginner

Time to Complete - 1 hour

Create these fun, slider bracelets in a flash! Two drop, even count peyote technique is used to create each band. The finished edge is added using brick stitch technique to hold the slider charms in position on the band.

Legend for Designs 1, 2, and 3

D11A - Size 11/0 Delica Seed Bead in your design's main color

D11B - Size 11/0 Delica Seed Bead in your design's accent color

Slider Bead - Various

Design 4 is an option to use Size 11/0 round Czech: S11A and S11B

Step 1 - Design 1, 2, and 3

Cut 50" [127 cm] of thread and thread a Size #12 Hard Beading Needle. It is okay to use a Size #10 beading needle. Fold over the thread to a comfortable working length.

Leaving a 15" [38 cm] tail, pick up (4) D11A. Pick up (2) D11A and go through the first (2) D11A. [Turn, pick up (2) D11A, go through the last (2) D11A added] to desired bracelet length.

Step 1 - Design 4

Cut 50" [127 cm] of thread and thread a Size #12 Hard Beading Needle. Fold over the thread to a comfortable working length.

Leaving a 15" [38 cm] tail, pick up (4) S11A. Pick up (2) S11A and go through the first (2) S11A. [Turn, pick up (2) S11A, go through the last (2) S11A added] until you reach the length at which you will place your first charm. Slide the charm over the last two S11A. Pick up (2) S11A and turn to go through the last (2) S11A, making sure to stay beneath the slider bar. Build the next few stitches, then repeat this step to add the next slider charm (or go through the next bar of a large slider). Continue building the rest of the bracelet to desired length.

Step 2 - All Designs

Pick up (6) D11A (S11A for design 4). Go through the last (4) D11A added in step 1. Go through all the beads again twice to reinforce.

Step 3 - All Designs

Pick up (2) D11B (S11B and A for design 4). Needle under the second thread bridge above the D11A then come back up through the last D11B added. If desired, go back through the first D11B and under the thread bridge below it to correct any sway in the D11B beads. Repeat to exit the second D11B.

Step 4 - Designs 1, 2, and 3

Slide the slider charms onto the band. Position them to get an idea of where you will secure them in position. Brick stitch to the point of the first slider bar. Weave back down through the previous D11B and through the work to exit from the D11A on the other side of the slider's bar. Restart brick stitch.

Tip: If you're adding a large slider with multiple bars, between which beads will fit, go ahead and brick stitch in between them. Otherwise, brick stitch to the spot where your next slider will sit and repeat this step.

Step 4- Design 4

Working a version of design 4 with S11B beads, brick stitch up to the first slider bar. When you reach it, weave as shown in the above diagram to exit on the other side of the bar. Begin brick stitch again on the other side. Repeat this as needed to create the row of brick stitch around the bars.

Step 5 - All Designs

Complete the row of brick stitch to the end of the bracelet. Refer to Step 2 to create the second beaded loop at the end. Use jump rings to attach clasp and charms to each loop.
