Materials

John Bead Czech Seed Beads Size 6/0
Groovy Grape Mix, SKU 10627170
Sapphire Silver Lined, SKU 10478817
Emerald Silver Lined, SKU 10627176
Pineapple Jello, SKU 10627195
Saffron Orange, SKU 10478802
Silver Lined Ruby, SKU10478812

Silver Plated Memory Wire, SKU 10376078

Memory Wire Shears, SKU 10332397

Round Nose or Bail Forming Pliers, SKU 10223254

2" Clear Stackable Bead Storage by Bead Landing, SKU 10035496

Beading Mat SKU 10348546

Skill Level - Beginner

Time to Complete - 1 Hour

Join Designer Carlotta Carlisle in the studio to create fresh and fabulous rainbow bracelets with John Bead Czech Seed Beads and memory wire!

Create any design you'd like. Try color blocks, stripes, or your own ideas.

Step 1
Memory wire comes in a large coil. You'll first need to cut it down to the number of desired wraps around the wrist. How long you cut the wire will determine how long the bracelet is and how many beads you want to use.

Tip: If you're just starting, a shorter bracelet is a great way to start.

Cut the memory wire using memory wire shears. Be sure to only use memory wire shears, as memory wire will damage flush cutters made for copper wire.

Step 2
Using round nose or bail forming pliers, pinch one end of the wire and roll it into a loop. This will keep your beads from sliding off the wire and form down any sharp edges.

Step 3

Feed your beads directly onto the open end (non-loop side) of the wire in whatever pattern you like. Be creative! Any selection of colors and combination will work. In the designer samples, a rainbow palette was used in a color block pattern to create a rainbow colored bracelet.

Step 4

After stringing on your last bead, use the round nose or bail forming pliers again to form a loop next to your last bead. Trim any excess wire using the memory wire shears, and use the forming pliers again to flatten any stray wires that may poke or snag clothing.
