John Bead
ESTABLISHED 1954

Daisy chain is a seed beading favorite, perfect for springtime jewelry. Choose any colors and create a set of stacker bracelets, earrings, necklaces, and anklets! These can become anything you imagine.

There are lots of variations when it comes to making daisy chain stitches, and many adaptations are possible. In class we will show square daisy chain. It creates a tennis bracelet of flowers side by side. The stitch is very stable compared to most daisy chain and doesn't have that tendency for gaps you often see in other versions.

For more inspiration, check out our previous class, Pearl Daisy Chain, linked here:

[Pearl Daisy Chain Class with John Bead for Michaels](#)

Abbreviations

S8A - Color A Size 8/0 Seed Bead

S8B - Color B Size 8/0 Seed Bead

Step 1

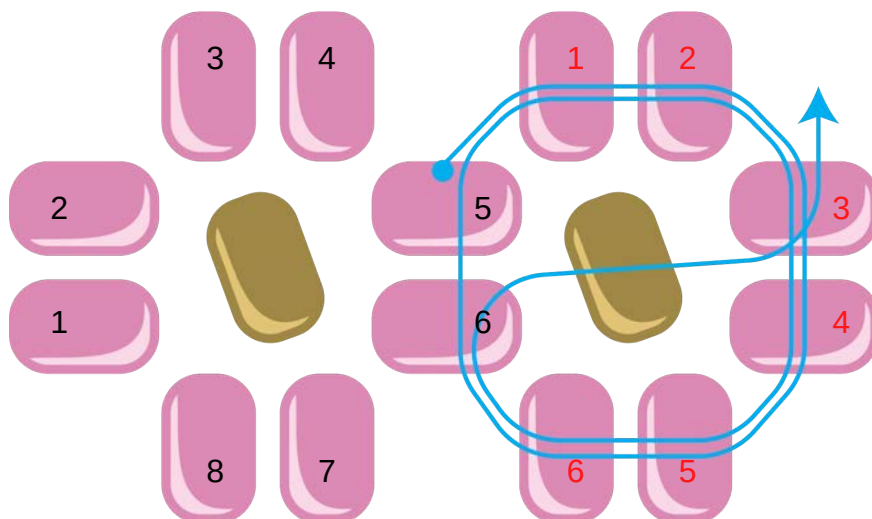

Cut 75 inches of beading thread and thread a size #10 beading needle. Leaving a 10 inch tail, string (8)S8A. Go back through the first two S8 to form a ring. Reinforce around, then weave to exit from the first S8.

String (1)S8B. Jump over the center of the ring. Go through the 5th seed bead in the ring. It'll be the one diagonally across from the one you're exiting. Go through the bead heading in the same direction as your exiting thread. It'll look like this.

Step 2

This step is repeated to desired length. String (6)S8A. Form a ring by going back through the 6th and 5th beads in the previous ring. Reinforce this around, exiting from the 6th bead in the previous ring. String (1)S8B. Go through the 3rd bead strung in this step. Again, this is the bead that will be across the center of the ring, diagonally from the one your thread is exiting.

Step 3

Repeat Step 2 to desired length, minus clasp (adds approximately 1 inch). Use the working and tail threads to create empty loops (loops without S8B in the center). Reinforce each of the loops an extra pass or two for strength. Weave remaining thread back into the work and trim.
