Beading Mat SKU 10348546

Skill Level - Beginner

Time to Complete - 1 Hour

This fun design was inspired by Regency Era jewelry and the timelessness of pearls that are so on-trend today. A golden setting for each pearl is created with matte flax John Bead Czech Super Duo beads paired with Barley Ivory 8/o rounds.

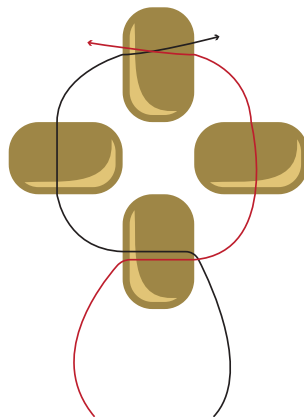

Size 8/o Seed Bead	S8
Superduo Bead	Duo
6mm Pearl	Pearl

### Step 1

Green Color Wildfire Thread in .006 was used to construct this stitched bracelet. A length of 75 inches [190 cm] should give you plenty of length to complete the design without adding thread.

Flatten each end of the Wildfire thread with chain nose pliers to help with threading a size #12, hard beading needle onto each end, folding over at 7 to 10" [25.4 cm] to create a comfortable working length with each side.

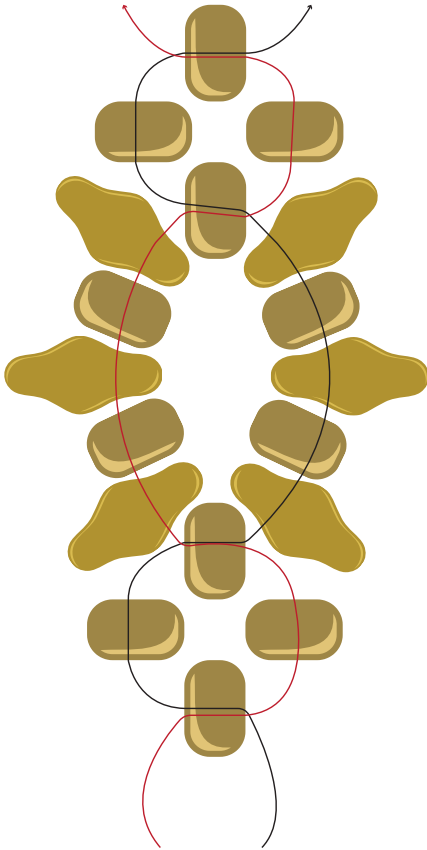

Bring a size 8/o seed bead (S8) to the center of the thread. Pick up an S8 bead on each strand. Bring the strands through another S8 bead, in opposite directions.

## Step 2

On each strand, string [Duo, S8, Duo, S8, Duo]. Bring each strand in opposite directions through an S8 bead.

Pick up an S8 bead with each strand, then go through another S8 in opposite directions.

## Step 3

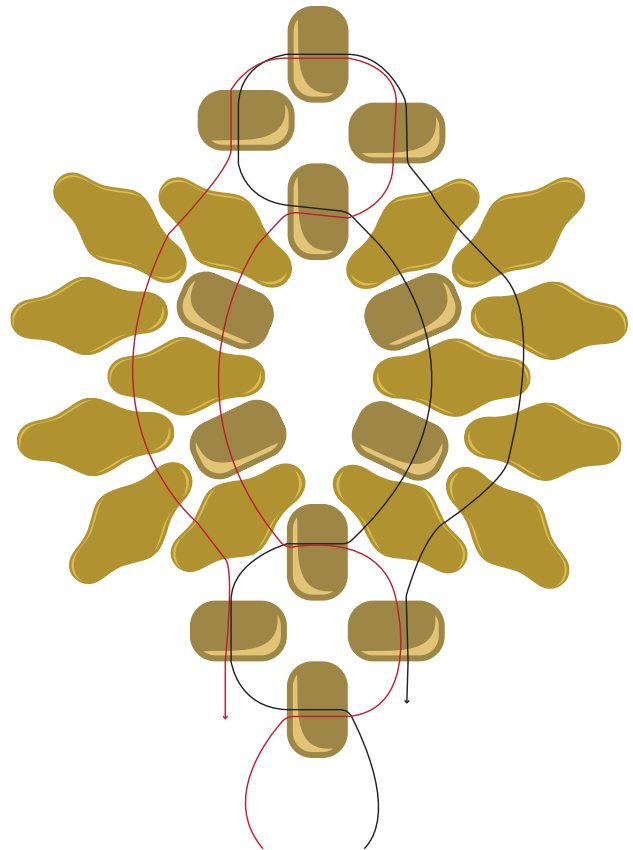

Repeat Step 2 to desired length. The sample bracelets have 10 repeats and yield a 6.5 inch bracelet.

## Step 4

After finishing your last repeat of Step 2, continue with each strand back through the next S8 bead. With each strand, go through the top hole of the first Duo. [Pick up (2) Duo. Go through the top hole of the next Duo] twice.

With each strand, continue through the next S8 bead.

Repeat this step for each remaining segment.

## Step 5

Leave behind one working strand.

It will be used to attach the clasp

at this side. With the other

working strand, go through the

next (2) S8 beads. Continue

through the bottom hole of the

next Duo, the next S8, and the

bottom hole of the next Duo. Pick

up one 6mm pearl. Crossing over to

the other side of the segment, go

through the bottom hole of the

center Duo on the other side. Go

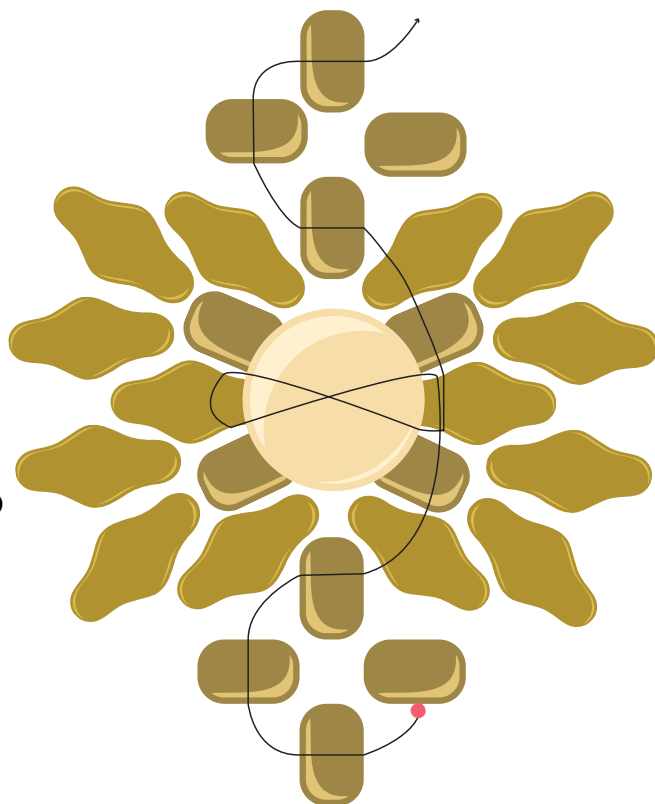

through in the opposite direction

to the one your thread is exiting.

Go back through the pearl, Go

through the opposite, bottom hole of the Duo bead on the other side of the segment.

Go through the next S8, Duo, and then go through the next (3) S8.

## Step 6

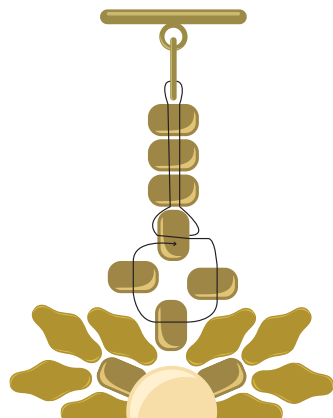

To attach a toggle clasp\*, use the working thread remaining on this

side to pick up (3) S8. Go through the clasp and then back down

through those same (3) S8. Go through the S8 below in the opposite

direction of your exiting thread. Loop around the circle, that is the

next (3) S8, then repeat this path twice more.

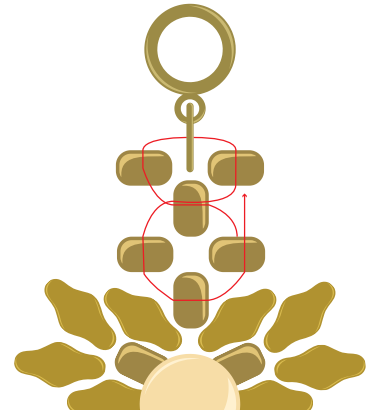

Refer to step 8 for instructions on weaving in the remaining working thread you have on this side.

\*Note - If you're using another clasp style (non-toggle) skip to Step 7 for both sides.

## Step 7

Return to the other strand of working thread left at Step 5. With that strand, Go through the next S8, Pick up a new S8, go through the clasp, then pick up a new S8. Go back through the next S8 in the opposite direction of your exiting thread. Loop around through the next (3) S8.

Pick up a new S8, go through the S8 above it. Go through the clasp, then through the next S8. Pick up a new S8 and go through the S8 below it. Loop around the next (2) S8 and then continue through the (2) S8 above, the clasp, and then come back down through the next (4) S8.

## Step 8

Weave in remaining working strands by going through the next Duo and S8 beads. Make some turns around using the Duo beads and looping through the S8s in the next segment. Trim remaining thread after you have changed direction three times.

I hope you will enjoy this design! Be sure to try out different colors and clasp styles and share your creations!
