Intermediate Bead Weaving

1 hour class

Let's create a beautiful lace stitch with John Bead Czech seed beads! In this class we will use Right Angle Weave stitch technique to create jewelry that looks like lace crochet.

Abbreviations used in these instructions include:
S6 - Size 6/0 Czech Seed Bead, Crystal Blue
S10 - Size 10/0 Czech Seed Bead, Hummingbird Blue

Step 1
Cut approximately 90 inches of beading thread, more or less depending on your plans for the design. Adding thread is possible as well, so working with a comfortable length is perfect.

Thread a size #12 beading needle. String (4)S10 and go back through the first S10 strung. Reinforce this for strength by going back through all the beads again, then travel through the next (2)S10 to exit from the opposite side as the exiting tail thread.

Step 2
String the following: [(1)S6, (1)S10] three times, plus (1)S6. Go through the S10 your thread is exiting heading in the opposite side from the exiting thread. Continue through (1)S6, (1)S10, (1)S6, and (1)S10.

Step 3
String (3)S10. Go back through the S10 your thread is exiting, heading in the opposite side from the exiting thread. A right angle weave segment will form. Continue through the next (1)S6 and (1)S10. String (3)S10. Go back through the S10 your thread is exiting.

Travel through the next (1)S6, (1)S10, (1)S6, and (1)S10. String (3)S10. Go back through the S10 your thread is exiting. Continue through the next (1)S6 and (3)S10.

## Step 4
Refer to Steps 2 and 3. Repeat these steps to desired length. Reinforce any loose places as needed by going back through the beads of any loose segments.

Step 5

Finish the ends with a wire guardian. With your thread exiting from the last S10, string (1)S10, go through the wire guardian, and string (1)S10. Make another pass through this step, reinforcing once, but stop after exiting the S10 below the guardian. String (1)S10, go through the S10 below, continue through the next (2)S10. String (1)S10, then continue through the next S10, go through the guardian, and back through the S10 below.

Weave in your remaining working thread and trim. Repeat this step on the other side, using the tail thread.
