STITCH-IN FINDINGS GUIDE

The even-count peyote stitch-in findings are a beginner-friendly way to give your beadwork a professional finish. The asymmetrical design is made to fit centered on the edge produced by even-count peyote-stitch beadwork. The findings are designed to work with stitched pieces that are 8 beads wide or larger.

Preciosa 8/0

Size 8/0 Even-Count Peyote Stitch-In

The built-in beads on the finding are sized to fit most size 8/0 brands. We have tested the following to ensure that they fit well with the finding.

Size 11/0 and 10/0 Even-Count Peyote Stitch-In

There is some variation between brands in seed bead thickness. We discovered this difference to be more significant for fit when working with smaller size beads. This finding has been designed to fit a bead thickness of approximately 1.3 to 1.4mm, which fits the following sizes and brands.

How to Use the Even-Count Peyote Stitch-In

The steps to sew on the finding are the same for all sizes.

Create an even-count peyote stitch design that is 8 beads wide or larger. Be sure to leave at least 10-inches of tail thread at the start, and finish with 10-inches or more of working thread.

Center a pair of stitch-in findings on either end of your design, as shown. Weave through the beads along the thread path indicated to secure and reinforce the finding. Weave in remaining thread and trim. You now have a light, flat finish that looks very professional! Super easy, beginner-friendly.

Working a larger design? Center the finding and stitch-in. Any even-count design will have a center-point when using this finding. Have something really wide? Try using two findings to finish wide edges.

PROJECTS!

Any even-count, peyote stitch pattern will work with these findings, but here is a design idea to try! This pattern will work with any of the bead brands / sizes and appropriate finding as identified on Page 1.

Using even-count peyote stitch, create a repeat of the following pattern to desired length. Be sure to leave a 10-inch tail to start, and finish with enough thread to sew on the finding. Refer to Page 2 for instructions to sew on the finding.
