Introduction

This PDF is a guide that supports our video, Easy Macrame Boho Keychain, on @JohnBeadCorp YouTube Channel

Step 1

Cut three lengths of 1mm Knotting Cord. Each cord should be 35-inches long.

Step 2

Lark's Knot each strand to your ring at the midpoint. Secure your ring to the top of a cork board or clip board.

Step 3

Begin Double Half-Hitch Knots. Working from the center out, with the holding cord (green dot), tie double half-hitch knots with the working cords (red dots).

Repeat Step 3 to complete the right-hand side using the center, right holding cord.

Step 4

Slide up a bead onto the center, middle cords. Bring the edge cords inward as holding cords and knot to them with the next two working cords from outside in.

Knot the two, middle cords that hold the bead onto the two holding cords from each side. With the now center cords, double half-hitch knot treating the left side as holding cord and the right side as the working cord. You should have the knots as shown in the final photo below.

Step 5

Work double half-hitch knots from the center out using the marked cords. Slide a bead onto the edgemoast cord before knotting it.

Repeat Step 4 on the right-hand side.

Repeat from Step 4 desired number of repeats. End your last repeat after Step 4. To finish your design, repeat another row of double half-hitch knots working with the outer cords as holding, and carrying the previous working cord into the second knot. Finish with a tassel by square knotting or silk wrapping the ends. You can also add beads to the ends to finish.
