- TEX 30x3 jeans crocheting thread;  
a Big Eye needle or a stringing needle with  
a loop made from a fine line;  
a 1.25 mm hook; a monofilament thread

- components: 5 mm connecting rings;  
eye pins; a magnetic fastening

- scissors; pliers

**Difficulty:** ● ● ● ● ●

**Technique:** crocheting

## Procedure:

### Step 1

The knot is created from two crocheted tubes, each 22 cm long (ca 17 cm for a wrist bracelet). String the rocailles onto a 150 cm long piece of yarn according to the pattern (fig. no. 1a The pattern) for the first tube. For the second tube, only string **R10b** onto a 150 cm long piece of yarn.

### 1a. The pattern

### The stringing procedure

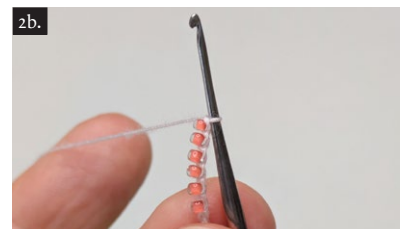

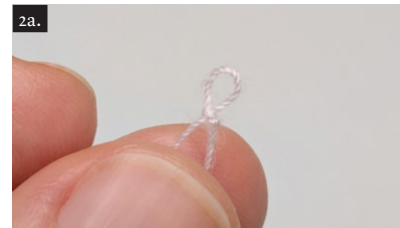

### Rocailles

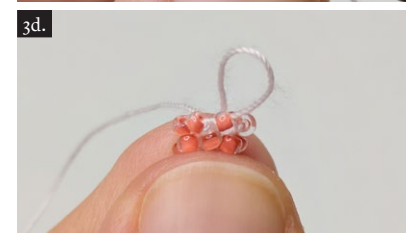

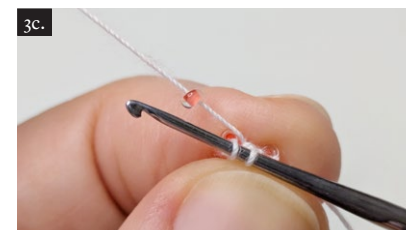

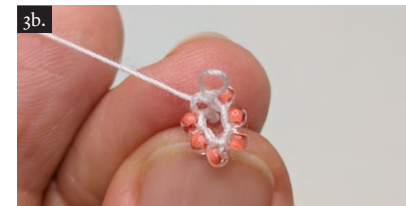

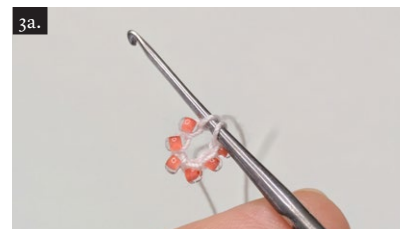

### Step 2

Create the initial stitch. Keep it relatively large as you will later use it to connect the rocailles into a circle (fig. no. 2a). Count off 6 rocailles and crochet a chain with the rocailles. Shift one rocaille as close as possible to the hook and then catch the yarn behind it and crochet the first stitch with a rocaille. Repeat the procedure 5 more times and in doing so create 6 chain stitches with 6 rocailles (fig. no. 2b).

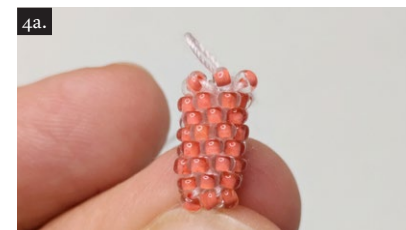

### Step 3

Then pass the hook through the first initial stitch and pull the yarn through both stitches at once (fig. nos. 3a - 3b). Poke the hook into the stitch to the left of the first rocaille, twist the rocaille downwards and to the right, move the next rocaille as close as possible, catch the yarn with the hook and crochet a slip stitch (pull the yarn through both stitches at once) (fig. no. 3c). Add the rocailles to the second row (fig. no. 3d).

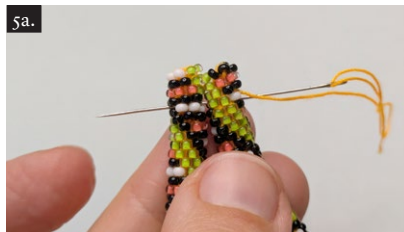

### Step 4

Crochet a slip knot with rocailles going round in a spiral. If all of the rocailles have their holes turned towards the direction of the crocheting (i.e. upwards), you have proceeded correctly (fig. no. 4a). Continue crocheting until you have used up all the rocailles and create two tubes (fig. no. 4b).

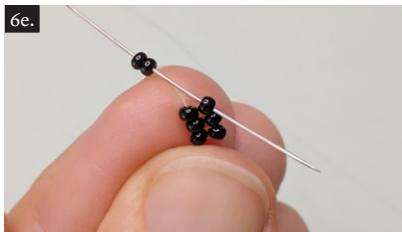

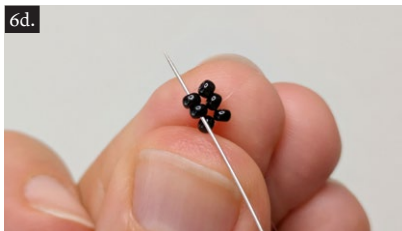

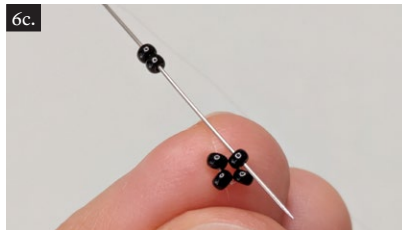

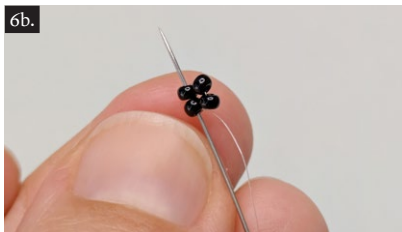

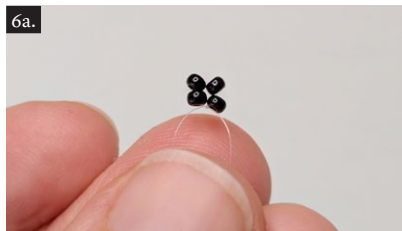

### Step 5

Use the remainder of the yarn to sew the ends of the tubes together (fig. nos. 5a – 5b). Attach an eye pin (fig. no. 5c).

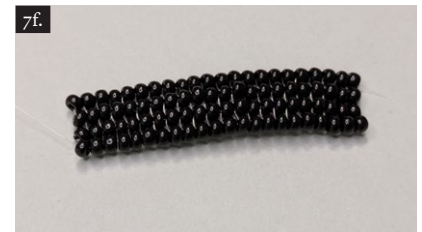

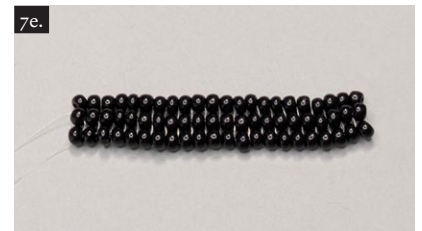

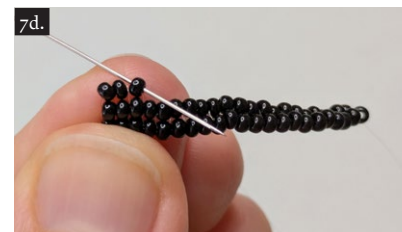

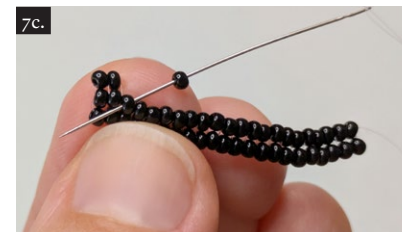

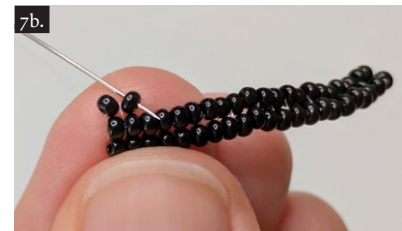

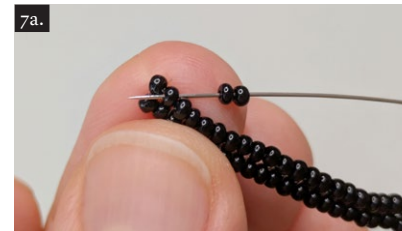

### Step 6

Sew a cap made from black rocailles. Sew the first row using a herringbone stitch. String 4x **R10c** onto a line, move them to the end of the line and tie two knots (fig. no. 6a). Pass the needle through two **R10c** (fig. no. 6b), collect a further two **R10c** on the needle and thread the needle downwards through the adjacent **R10c** (fig. no. 6c). Then pass the needle upwards through the next adjacent **R10c** (without adding any rocailles) (fig. no. 6d). Add another two **R10c** in a similar way and continue until you have a line with 22 rocailles (fig. no. 6e – 6f).

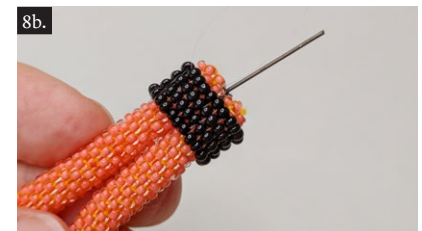

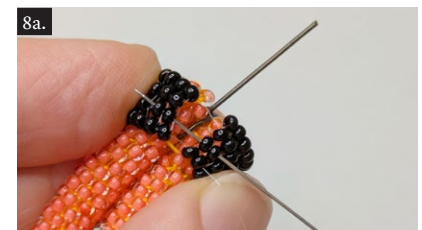

### Step 7

Sew on another row in the next step. String 2x **R10c** and pass the needle through the second **R10c** of the previous row (fig. no. 7a). Pass the needle through the second **R10c** of the newly added row (fig. no. 7b). String 1x **R10c** and pass the needle through the third **R10c** of the previous row (fig. no. 7c). Pass the needle through the newly added **R10c** (fig. no. 7d). Continue in this way to the end of the row (fig. no. 7e). Sew another row in the same way (fig. no. 7f).

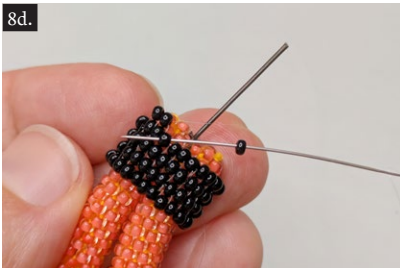

### Step 8

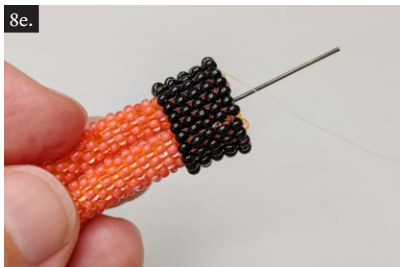

Sew the strip around the ends of the tubes (fig. nos. 8a – 8b). Sew one more row according to Step 7 as necessary (fig. nos. 8c – 8e). In the following row, sew on every second **R10c** (fig. no. 8f) and then connect them together and tighten them (fig. no. 8g).

8e.

8f.

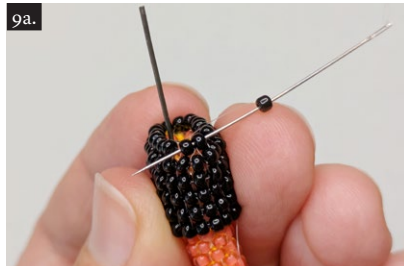

8g.

## Step 9

In the last row, also sew through every second **R10c** and tighten them (fig. nos. 9a – 9b). String a decorative **R8b** roccaille onto an eye pin, create a loop with the pliers and then insert a ring for connecting the fastening into it (fig. no. 9c). Finish the second tube in the same way (fig. no. 9d).

9b.

9c.

9d.

## Step 10

Thread the ends of the tubes so that a knot is created (fig. nos. 10a – 10b). Attach the fastening (fig. nos. 10c – 10d).
